Business description

Staff Service joined the Recruit Group in 2007 and currently is providing comprehensive HR services that mainly focus on staffing but also include permanent placement and outsourcing services. With locations across all 47 Japanese prefectures and more than 70,000 temporary staff, services are provided in five business fields: clerical; engineering; IT engineering; nursing care, healthcare & medical; and manufacturing. While covering these service areas and business fields, our strengths make it possible for us to address the recent serious labor supply problems and create many job opportunities. Through our Mirayell

service, which specializes in clerical staffing for indefinite duration, and in the engineering field, which requires a high level of skill, we are enhancing worker training and career support and as a result are successfully finding work opportunities for job-seekers who lack experience. As employment and work patterns and the economic structure continue to change, we are focused on responsively meeting the diverse needs of companies and individuals and addressing the negatives relating to employment and work. In doing so, we are creating a world where people who want to work can do so with peace of mind.
